SOLID SURFACE

The Art of Seamless Interior Architecture

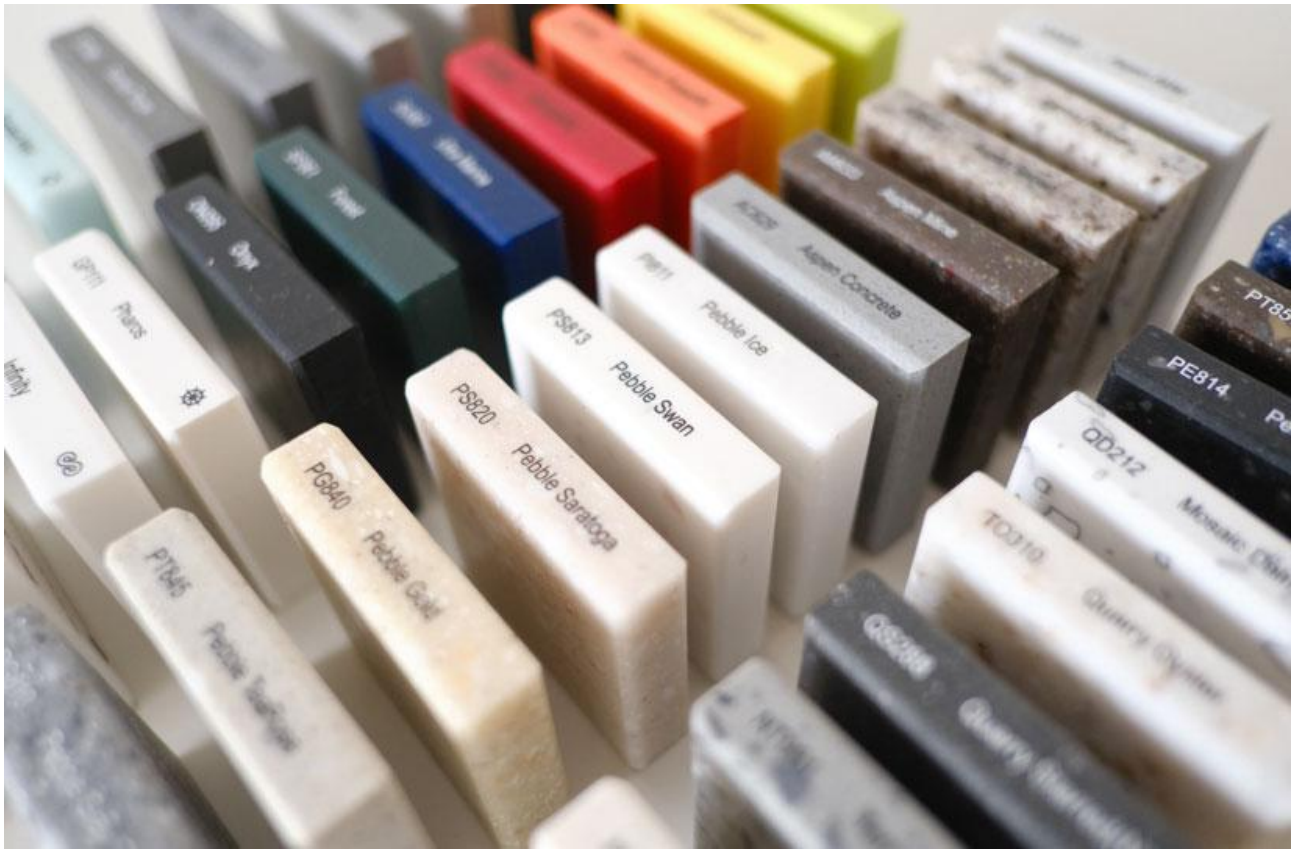

Premium Surfaces • Custom Fabrication • Innovative Design

Residential | Commercial | Hospitality | Healthcare | Retail | Corporate

01 — WHAT IS SOLID SURFACE?

Solid Surface is a premium engineered surface material made primarily from mineral fillers and acrylic/resin binders. It can be fabricated, joined, shaped and thermoformed into sophisticated architectural elements.

- Reception counters
- Kitchen countertops
- Bathroom vanities
- Integrated sinks & wash basins
- Wall cladding
- Restaurant counters
- Hotel interiors
- Retail displays
- Healthcare interiors
- Office furniture
- Feature walls
- Curved architectural elements

02 — WHY SOLID SURFACE?

Solid surface combines visual elegance with fabrication flexibility and practical performance.

- SEAMLESS BEAUTY — Specialized joints can be made highly inconspicuous, creating a continuous visual surface.
- NON-POROUS & HYGIENIC — Non-porous surfaces do not readily absorb liquids and are easy to keep clean. Some manufacturers specifically state resistance to mold, mildew and bacterial growth.
- EASY TO CLEAN — Smooth surfaces support straightforward routine cleaning and maintenance.
- DURABLE & LONG-LASTING — Designed for demanding residential and commercial applications.
- REPAIRABLE — Many scratches and surface marks can be professionally sanded and refinished.
- THERMOFORMABLE — Selected solid surfaces can be heated and shaped into curves, waves, rounded corners and complex forms.

Hygienic Solution

1. Due to its non-porous and seamless nature, solid surface is perfect for use in areas where hygiene is of the utmost importance.
2. Antimicrobial and checmical resistant.
3. No stain is ever permanent, providing a durable surface that is easy to clean and maintain.

Revolutionary Material Properties

1. Robust & Durable- High performance material made of natural minerals, offering a solid surface that is 100% waterproof and flame and impact resistant.
2. Seamless-Separate sections of solid surface can be brought together with inconspicuous joints for long continuous surfaces and cast like designs.
3. Renewable & Repariable- Even after years of use, it can be sanded and restored to its original condition.

03 — DESIGN WITHOUT LIMITS

Curves • Circles • Waves • 3D Forms

- Curved reception desks
- Floating counters
- Rounded vanity units
- Integrated wash basins
- Sculptural furniture
- Feature walls
- Coved corners
- Custom signage
- Backlit elements

04 — HYGIENIC INTERIOR SOLUTION

Designed for spaces where cleanliness, maintenance and seamless detailing are important.

- Hospitals & clinics
- Dental clinics
- Hotels
- Restaurants
- Corporate offices
- Luxury residences
- Retail stores
- Educational buildings

05 — INTEGRATED SINK TECHNOLOGY

COUNTER + SINK = ONE CONTINUOUS DESIGN

- Minimal visible joints
- Easy-to-clean transitions
- Modern appearance
- Custom dimensions
- Custom basin shapes
- Curved forms
- Wall splashbacks
- Premium luxury appearance

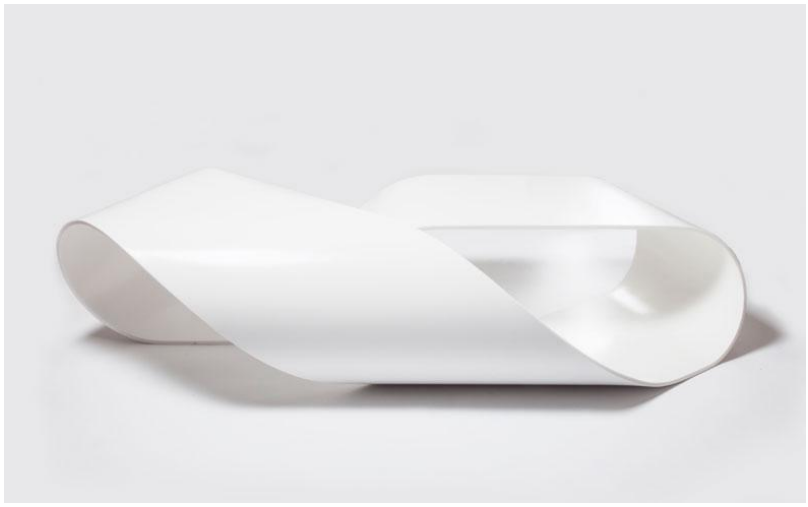

06 — BEAUTY THAT MATCHES YOUR DESIGN

Solid surface is available in a wide range of colours, patterns and visual effects.

- Pure White — Clean • Minimal • Contemporary
- Marble Effect — Luxury • Elegant • Premium
- Terrazzo Effect — Modern • Architectural • Artistic
- Concrete Effect — Industrial • Urban • Contemporary
- Natural Stone Effect — Sophisticated • Timeless • High-end
- Translucent / Backlit — Dramatic • Decorative • Signature

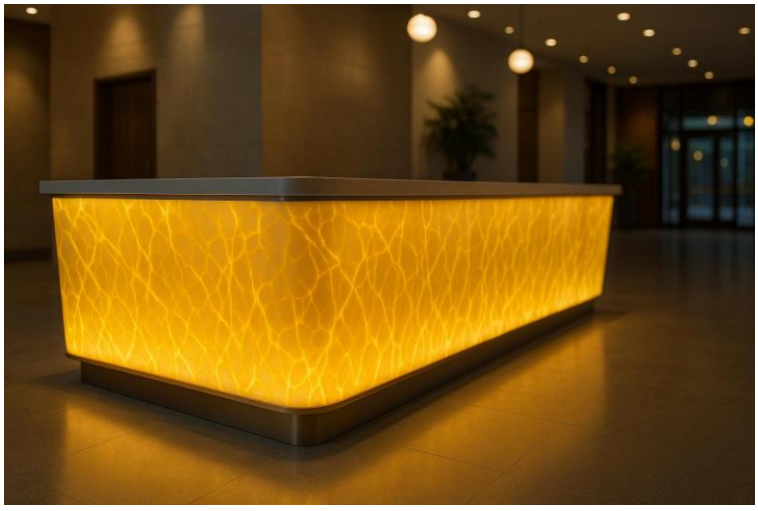

07 — BACKLIT SOLID SURFACE

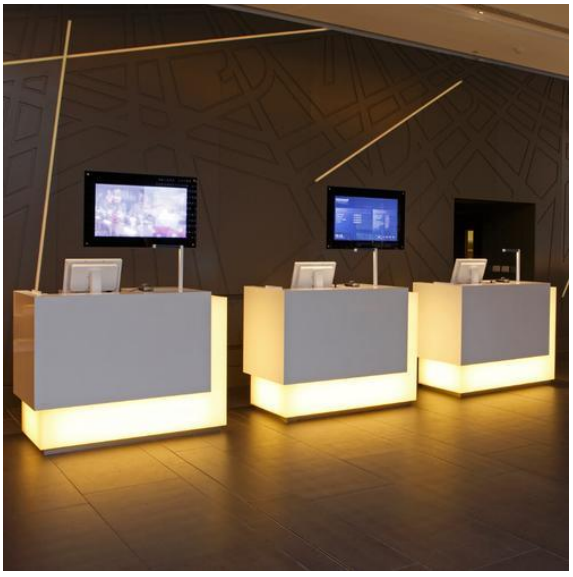

Turn surfaces into architectural light.

- Feature walls
- Reception logos
- Hotel counters
- Bar fronts
- Decorative partitions
- Vanity panels
- Retail displays
- Corporate branding

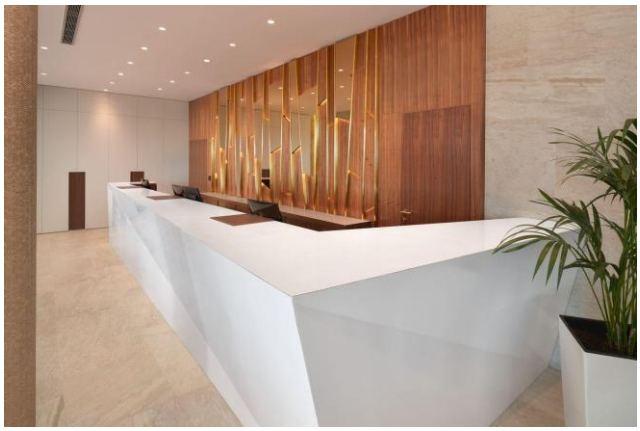

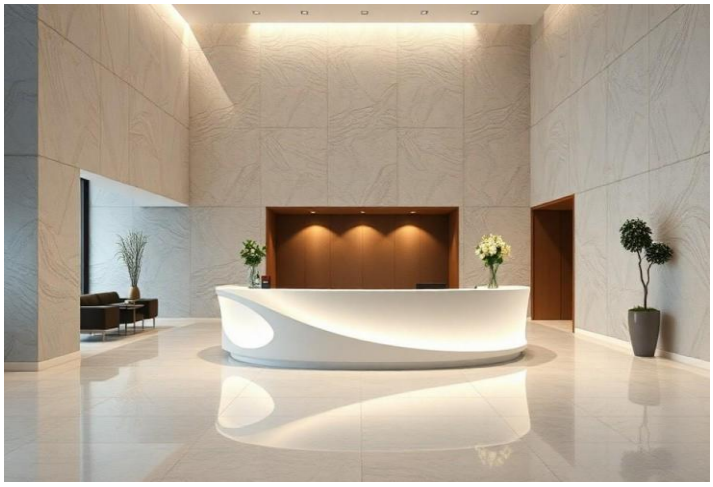

08 — SOLID SURFACE FOR PREMIUM RECEPTION

Make the first impression count.

- Elegant curves
- Integrated lighting
- Corporate logos
- Continuous countertops
- Seamless front panels
- Custom colours
- Premium stone effects

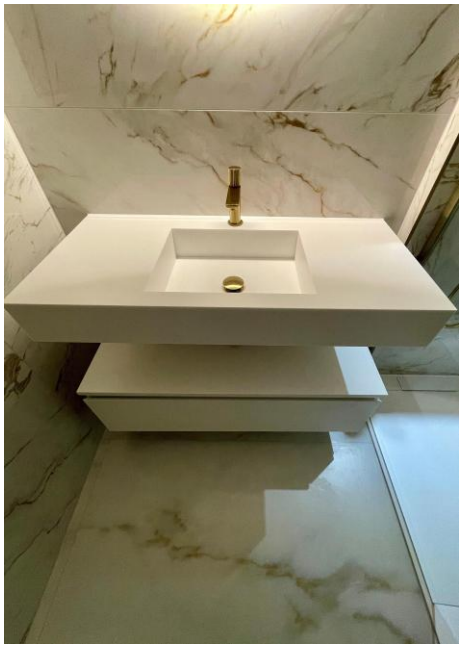

09 — SOLID SURFACE FOR BATHROOMS

Clean • Minimal • Luxurious

- Vanity tops
- Integrated basins
- Shower walls
- Bathtub surrounds
- Wall cladding
- Splashbacks
- Shelving
- Custom bathroom furniture

10 — SOLID SURFACE FOR KITCHENS

A smarter countertop experience.

- Kitchen islands
- Waterfall edges
- Integrated sinks
- Backsplashes
- Breakfast counters
- Bar counters
- Custom shapes

11 — LONGEVITY & RESTORABILITY

BUILT FOR YEARS OF USE

- USE → WEAR → RESTORE → CONTINUE
- Minor scratches and surface marks can often be removed through professional sanding/refinishing.
- Suitable for hotels, hospitals, restaurants, shopping malls, offices, airports and high-end residences.

12 — APPLICATIONS AT A GLANCE

Application	Solid Surface Advantage
Reception Desk	Seamless + sculptural
Kitchen	Hygienic + easy maintenance
Bathroom	Non-porous + integrated basin
Hospital	Hygienic + cleanable
Hotel	Luxury + durability
Restaurant	Easy maintenance + custom design
Retail	Branding + custom shapes
Office	Modern + professional
Residential	Premium + personalized
Feature Wall	Large seamless appearance
Furniture	Curved + custom fabrication
Signage	Engraving + backlighting

13 — WHY CHOOSE UTHAN DESIGN STUDIO?

DESIGN + MATERIAL + FABRICATION

- 01 — DESIGN: Architectural & interior concept
- 02 — MATERIAL SELECTION: Colour, pattern, thickness and application
- 03 — DETAILING: Joints, edges, curves, sinks and fixing details
- 04 — FABRICATION: Precision cutting, bending and finishing
- 05 — INSTALLATION: Professional site installation
- 06 — FINAL FINISHING: Sanding, polishing and quality inspection

UTHAN DESIGN STUDIO

SOLID SURFACE EXPERTISE & FABRICATION CAPABILITY

Professional Expertise. Advanced Machinery. Precision Craftsmanship.

Uthan Design Studio brings together an experienced team of designers, architects, engineers, fabricators and skilled technicians specializing in **solid surface design, fabrication and installation**.

Our integrated approach allows us to transform solid-surface materials from standard sheets into **seamless, functional and highly customized architectural elements**. From design development and technical detailing to precision cutting, thermoforming, joining, polishing and final installation, our team manages the complete fabrication process with close attention to quality and finish.

OUR TECHNICAL EXPERTISE

Our solid-surface specialists have experience in:

- Solid-surface countertop fabrication
- Seamless joining and joint treatment
- Integrated sink and wash-basin fabrication
- Thermoforming and curved applications
- CNC and precision cutting
- Edge profiling and finishing
- Sanding and surface polishing
- Custom furniture and architectural elements
- Wall cladding and feature panels
- Reception counters and commercial interiors
- Backlit and translucent applications
- Custom shapes and three-dimensional forms
- On-site installation and finishing
- Repair, refinishing and surface restoration

ADVANCED FABRICATION CAPABILITY

Uthan Design Studio utilizes specialized tools and machinery to achieve accurate dimensions, consistent detailing and high-quality surface finishes.

Our fabrication capability includes equipment and tools for:

PRECISION CUTTING
Accurate sheet cutting and component preparation according to approved shop drawings and fabrication details.

EDGE PROFILING
Controlled shaping, rounding, bevelling and finishing of edges to achieve the required design profile.

THERMOFORMING
Controlled heating and forming of suitable solid-surface materials to create curves, radius corners and customized three-dimensional forms.

SEAMLESS JOINING
Professional bonding and finishing techniques are used to minimize visible joints and create a continuous surface appearance.

SANDING & POLISHING
Multi-stage surface preparation and finishing to achieve the specified matt, satin or polished appearance.

CNC / PRECISION FABRICATION
Where applicable, computer-controlled and precision fabrication processes can be used for complex shapes, repeated components, cut-outs and detailed designs.

INTEGRATED SINK FABRICATION
Custom sink and basin solutions can be fabricated and integrated with countertops and vanity units to create a coordinated, seamless appearance.

FROM DESIGN TO INSTALLATION

Uthan Design Studio provides an integrated workflow:

01 — DESIGN & CONCEPT
Understanding the architectural vision, functional requirements and aesthetic objectives.

02 — MATERIAL SELECTION
Selection of suitable solid-surface colors, patterns, thicknesses and finishes.

03 — TECHNICAL DETAILING
Preparation of fabrication details, dimensions, joints, edges, curves, supports and installation requirements.

04 — PRECISION FABRICATION
Cutting, shaping, thermoforming, joining, routing and finishing using appropriate fabrication equipment and skilled workmanship.

05 — QUALITY INSPECTION
Inspection of dimensions, joints, edges, surface finish, color consistency and workmanship before installation.

06 — PROFESSIONAL INSTALLATION
Site installation, alignment, joint finishing and final surface preparation.

07 — FINAL HANDOVER
Final inspection and delivery of a completed solid-surface installation ready for use.

WHY UTHAN DESIGN STUDIO?

EXPERIENCED TEAM
A multidisciplinary team combining architectural, interior-design and technical fabrication knowledge.

SPECIALIZED FABRICATION
Dedicated capability for custom solid-surface fabrication rather than treating the material as a conventional countertop only.

DESIGN FREEDOM
Ability to translate complex architectural concepts into curved, seamless and customized forms.

PRECISION WORKMANSHIP
Attention to dimensions, joints, edges, curves, surface finishing and installation details.

COMPLETE PROJECT SUPPORT
From concept and material selection through fabrication, installation and final finishing.

CUSTOM SOLUTIONS
Every project can be developed according to its specific dimensions, functional requirements, design language and site conditions.

OUR COMMITMENT

At Uthan Design Studio, we believe that solid surface is more than a finishing material—it is a **design medium capable of becoming an integral part of architecture and interior space**.

Our combination of **professional design expertise, skilled craftsmanship, specialized fabrication equipment and project execution capability** enables us to deliver solid-surface solutions that are visually refined, technically considered and tailored to each project.

“Where Material Becomes Architecture.”
